Summary

Computer Science undergraduate skilled in MERN stack, REST APIs, MongoDB, and AI integration. Built and deployed scalable full-stack applications including AI-powered invoice automation systems. Strong problem-solving skills with active DSA practice in Java.

Education

B.Tech in Computer Science and Engineering, I.K. Gujral Punjab Technical University Aug 2023 – Present CGPA: 8.5/10

- **Coursework:** Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOP, Computer Architecture

Achievements

- Practicing DSA Problems on LeetCode and other Platforms on Daily Basis.
- Maintained 8.5+ CGPA in B.Tech CSE

Skills

- **Programming Languages** :JavaScript, Python, Java
- **Web Development** : React.js, Node.js, Express.js, Tailwind CSS, REST APIs, JWT Authentication
- **Databases** : MongoDB, SQL.
- **Tools** : Git, GitHub, Postman, Vercel, Render, VS Code.
- **Data Visualization** : Power BI, Tableau etc.

Projects/Internships

Invoice-AI | AI-Powered Invoice Management Platform

[GitHub](#) | [Live Demo](#)

[Tech Stack : MongoDB, React.js, Node.js, Tailwind CSS, Gemini API, Clerk-react/Auth, Vercel, Render]

- Built Invoice-AI, a full-stack AI-powered invoice management platform using the MERN stack.
- Integrated Google Gemini API to generate invoice details from natural language prompts.
- Implemented secure authentication, protected routes, and RESTful CRUD APIs.
- Deployed the application on Vercel + Render, resolving real-world production challenges such as CORS, environment variable configuration, and frontend-backend API integration.

Homodeal - Online Property visiting Platform

[GitHub](#) | [Live Demo](#)

[Tech Stack : PostgreSQL, React.js, Node.js, Tailwind CSS, JWT/Auth...]

- Developed a property visiting platform using PERN stack for property discovery and booking.
- Implemented secure JWT authentication and role-based access.
- Designed responsive UI with Tailwind CSS.

Certifications :

Web Development: Apna College

Data Analysis : SIT Institute
